

Gayathri Saravanan

Full Stack Developer

I'm a dynamic and self-driven individual, with a passion for making a difference in the engineering world. Serving various leadership roles across my school and college days has helped me groom my communication, organization, and team management skills. I am often acknowledged for my consistency and my knack for pitching the right ideas at the most desired times.

Tamil Full Professional Proficiency

Kannada Limited Working Proficiency

Full Stack Developer — JUL 2024 - PRESENT

IBM I Bengaluru, Karnataka, India

Led Kafka adapter development on a cloud platform, completing it within an accelerated two-month timeframe. Enhanced the on-premises Kafka adapter by resolving critical issues, managing customer escalations, and delivering timely solutions to ensure high customer satisfaction. Contributed to 2-way SSL feature implementation. Earned a recognition with a **role advancement** for outstanding performance.

Software Engineer II — APR 2023 - JUN 2024

Software AG I Bengaluru, Karnataka, India

Co-designed and developed a cutting-edge, brand-new adapter for IBM Power Systems within a compressed timeframe, earning the **Above and Beyond Award in Q4 2023**. Proactively resolved defects and led key enhancements across adapters like JDBC, AS400, OFTP, SAP, Kafka, MSMQ, and the Adapter Runtime framework.

Software Engineer I — JUL 2022 - APR 2023

Software AG I Bengaluru, Karnataka, India

Contributed to product development, process improvement, and knowledge transfer, handling customer/internal issues, SWAT queries, and SVN-to-Git code migration and validation. Quickly mastered server APIs, platform tech, and UI development, delivering complex features for business applications within 2.5 months.

Intern - Software Engineer — JAN 2022 - JUN 2022

Software AG I Bengaluru, Karnataka, India

Acquired hands-on expertise with Webmethods Integration Server, diverse adapters (JDBC, OFTP, SAP), and interfacing with a range of backends (Oracle, MySQL, MSSQL, rvsEVO by T-systems). I also worked on Jira Issue Template Management Tool using the Appsmith Framework. Contributed to customer sustenance, addressing SWAT queries.

Intern - Android App Developer — NOV 2020 - JUN 2021

Samsung Research Institution | Bengaluru Urban, Karnataka, India

Executed an Android Application Development project using the Server Driven UI (SDUI) framework for the payment use case, gaining practical knowledge of Android Studio, Android application development fundamentals, and server-driven UI concepts. Awarded a **Certificate of Excellence** by Samsung Prism.

Intern - Frontend Developer — SEP 2020 - OCT 2020

MD Global Technologies | Coimbatore, Tamil Nadu, India

Working on this project, I became proficient in core frontend technologies like HTML, CSS, and JavaScript, gaining a strong understanding of UX concepts. I used this expertise to design and customize e-learning frontends tailored specifically for school students.

Achievements

- Certified by NATIONAL SCIENCE AND TECHNOLOGY FAIR, Codissia for Toxic Alert System.
- Served as Secretary of the Youth Outreach Club at PSG College of Technology. 2021 - 2022
- First Runner-Up in the Event CAT-A-THON conducted by Caterpillar Inc all over India. 2021
