Screen 4- FATCA (Foreign Account Tax Compliance Act) Details

FATCA is an acronym for the United States Foreign Account Tax Compliance Act. FATCA is aimed at ensuring that US persons with financial assets outside of the US pay US tax. The new rules require foreign financial institutions (FFI's) to provide the (IRS) Internal Revenue Service with information on certain investments of US persons invested in accounts outside of the US and for certain non-US entities to provide information about any US owners.

To accommodate FATCA, the Government of India had inserted Rules 114F to 114H and Form 61B in the Income Tax Act in 2014. The Indian Government also signed the Inter- Governmental Agreement (IGA) with the United States of America in the year 2015 for the implementation of FATCA. According to the agreement, Indian tax officials are required to obtain specific account information from US investors. The goal was to ensure tax compliance by the US citizens while increasing transparency for their Internal Revenue Service (IRS). This gave a legal basis for the Reporting Financial Institutions to maintain and report personal and income details.

Subscriber's Correspondence Address

Tax Identification Number- PAN detail

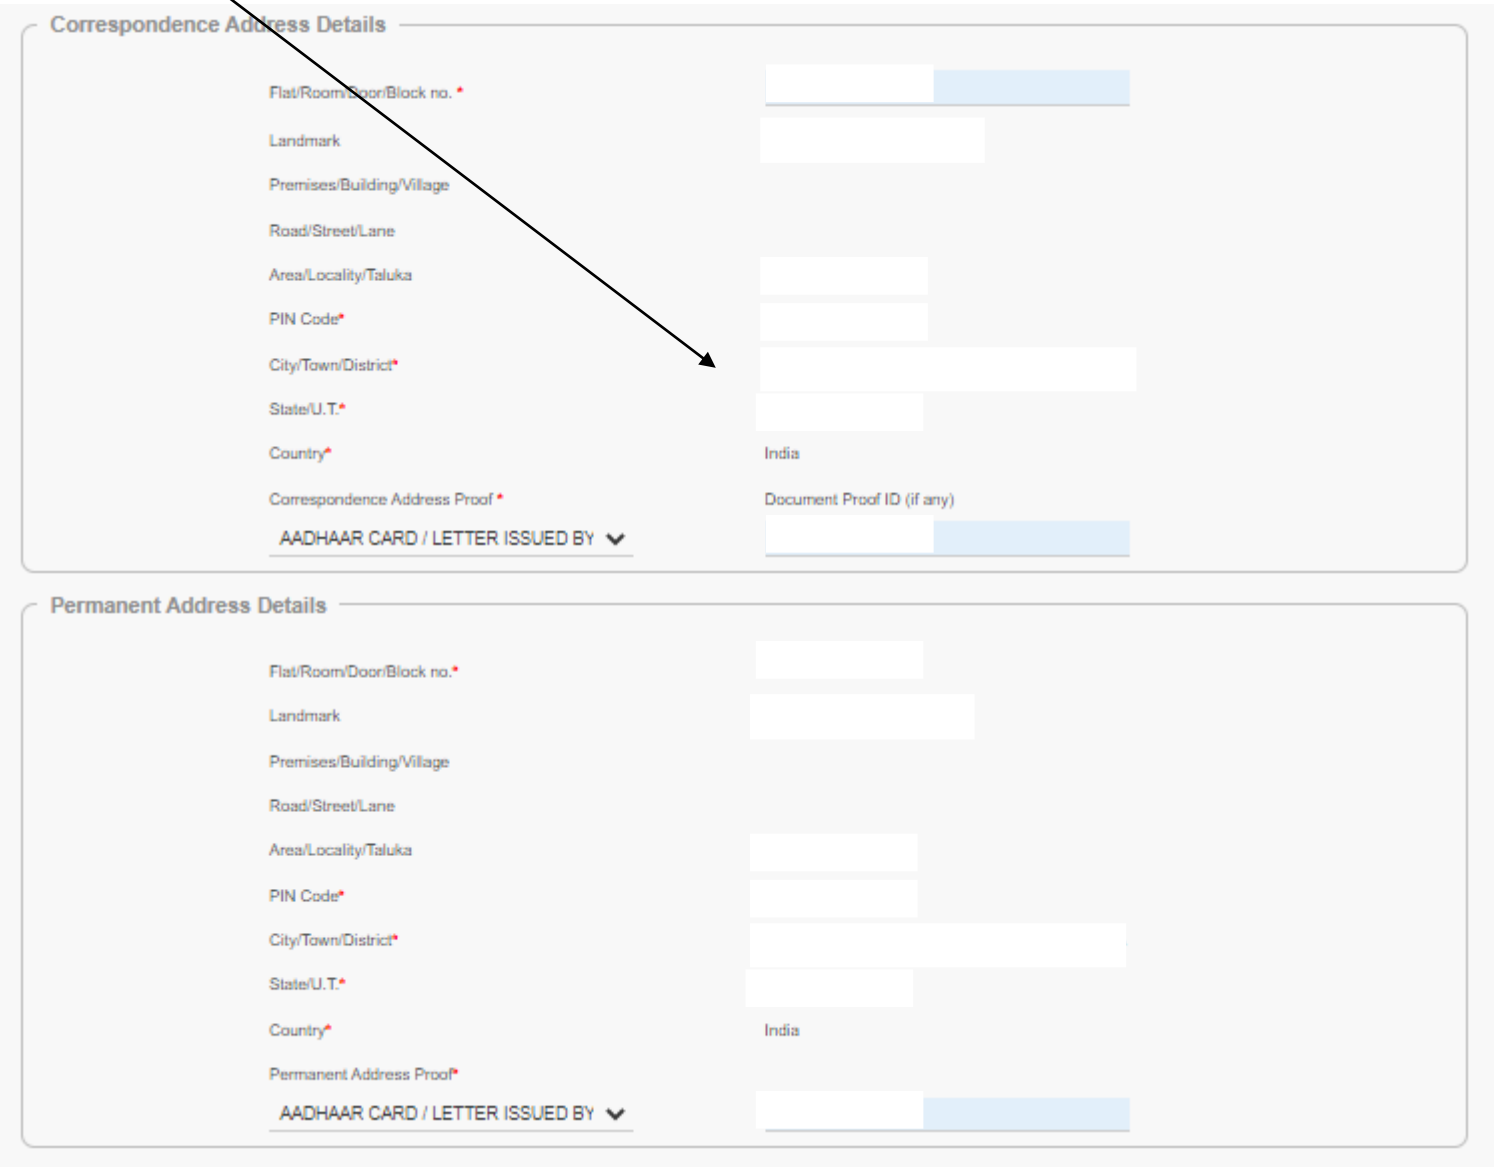

Subscriber's State

Subscriber's City

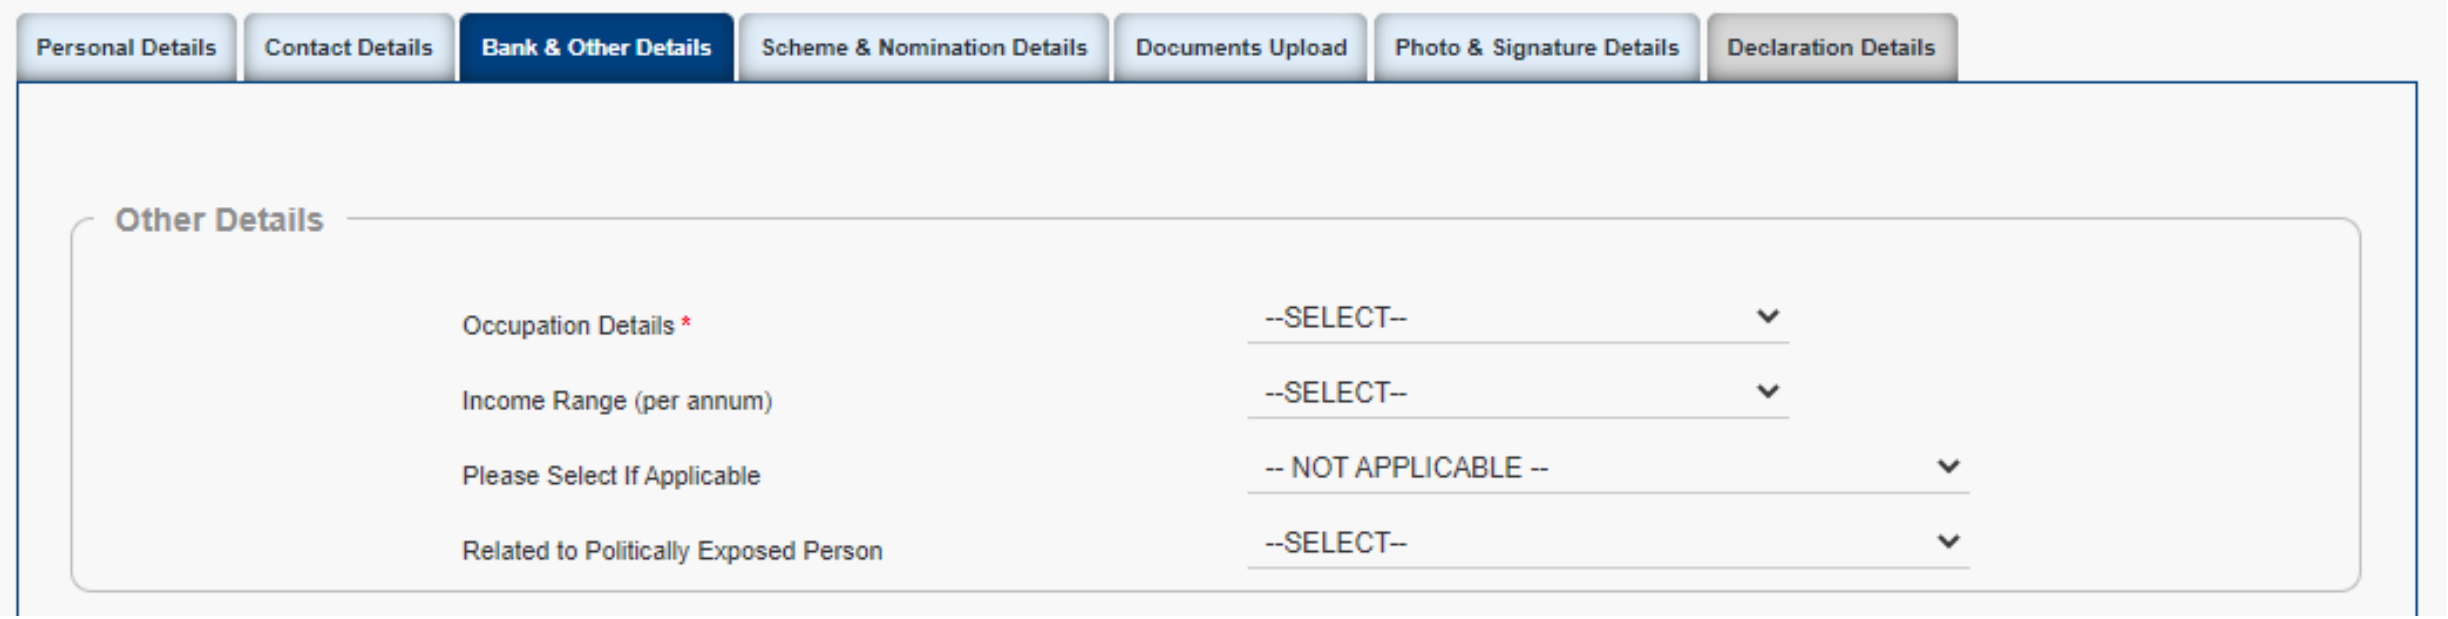

Pin Code of the City
